

```
cd /Users/chowdhuryelma/Documents
mkdir python_stuff
cd python_stuff
python3 -m venv env
source env/bin/activate
pip install django
pip install --upgrade pip
django-admin startproject my_project (create project)
cd my_project
python3 manage.py runserver
```

```
python3 --version
pip install django
django-admin --version
django-admin startproject my_project (Project Create)
cd my_project
ls: manage.py    my_project
VS Code:
File -> open folder -> Django -> my_project
Creating virtual environment in VS: python3 -m venv django_vm
Activating env: source django_vm/bin/activate
Django installation in the env: pip install django
Upgrade pip: pip install --upgrade pip
pip --version
python manage.py runserver
python3 manage.py makemigrations
python3 manage.py migrate
```
